Australia's population is ageing. By 2050, the number of people aged 65 to 84 years is expected to more than double and the number of people aged 85 + years, more than quadruple. What does it mean to grow old? Should Australians prepare for a world of nursing homes and dementia? Should we continue to work & study? Can we choose how we age? How should the aged, who need care be cared for?

#### How do we continue to love life, as we grow older?

Loving Life in Late Life will bring together experts with extensive experience in areas from advocacy, education & policy to clinical practice.

Hear insights from those responsible for supporting people as they grow old and discuss future challenges and opportunities.
